

Jordan Lee

Product Manager · jordan.lee@example.com · (555) 019-2231 · Remote / San Francisco Bay Area

Summary

Product manager with six years of experience shipping data and analytics products for B2B SaaS companies. Skilled at translating ambiguous customer problems into shippable roadmaps, partnering closely with engineering and design, and using quantitative analysis to prioritize ruthlessly. Led two products from zero to their first meaningful revenue milestones.

Experience

Senior Product Manager — Brightline Health (2023–Present)

- Owned the clinician-facing analytics dashboard used by 1,200+ care teams; redesigned the metrics pipeline, cutting report-generation time from 40 minutes to under 90 seconds.
- Ran quarterly discovery interviews with 30+ hospital administrators to identify the top three retention risks, resulting in a roadmap that reduced churn by 18% year over year.
- Partnered with data science to launch a predictive readmission-risk feature, now used in 60% of active accounts within two quarters of release.
- Managed a cross-functional team of 8 engineers and 2 designers using a lightweight Kanban process; shipped on a two-week release cadence with no missed deadlines in 12 months.

Product Manager — Northwind Analytics (2020–2023)

- Launched the company's first self-serve reporting tool, growing self-serve adoption from 0 to 35% of the customer base within a year.
- Defined and tracked activation metrics for the onboarding funnel, improving 30-day activation from 42% to 61% through three iterative experiments.
- Wrote and maintained the product requirements process adopted company-wide, reducing average scoping time for new initiatives by roughly a third.

Associate Product Manager — Northwind Analytics (2019–2020)

- Supported the founding PM on the core reporting product; owned bug triage and small feature iterations, shipping 40+ incremental improvements.
- Built the team's first customer feedback taxonomy, used to prioritize the following two product roadmaps.

Skills

Roadmapping and prioritization, SQL and data analysis, A/B testing and experimentation, user research, cross-functional leadership, stakeholder communication, Figma (collaborative reviews), Amplitude, Looker.
